

Trading 2018 Classical & Modern

**Breukelen, Netherlands
January 13, 2018**

An intensive private class with Dr. Alexander Elder
Author, *The New Trading for a Living* & other international best-sellers
Breukelen, Netherlands
Saturday, January 13, 2017, 10 am – 5 pm

Dear Trader,

Get ready for the new challenges and opportunities of the new year. We'll review psychological rules and technical methods that are working well and apply them to the current markets. We'll combine the essentials of the old and the new to hit the road running in 2018.

Treat yourself to a first-class workshop by a professional trader and one of the world's top teachers of trading – Dr. Alexander Elder. Invest a day in your education and growth – and collect dividends for the rest of the year and beyond.

Many markets worldwide continue to rise, and we have to make critical decisions. Should we follow the trend and buy – and if so, should we hop in right away or wait for a pullback? Or, with price/earnings ratios becoming high could this be the time to start taking profits and selling short?

The truth of the matter is that both of the above are correct. Some stock groups are set to continue their spectacular rallies, while others are acting tired and starting to turn down. This class will give you the tools you need to identify both groups and trade them – in the right direction, with the right entries, targets, and stops.

Your education in identifying and trading promising stocks will begin even before this workshop, as early as this coming weekend. As a special bonus for the January 2018 class participants you will receive access to Dr Elder's monthly webinars and weekend stock scans. Each Sunday you'll receive lists of bullish and bearish finds of his scans. Dr Elder personally reviews all scan results and marks most attractive candidates. This service cost \$140 per month or \$349 per quarter – but you'll receive it free with your class registration, starting immediately.

Dr. Elder comes out of his trading office only a few times a year to teach and travel – giving you a rare opportunity to study for a day with him in Holland. He'll show you how to recognize trends and turns, where to enter trades, how set stops and profit targets. You will see how to control risks and structure your homework. Everything in this class will be illustrated using current market examples.

Psychology: learn the best tool for developing discipline.

Technical analysis: learn to select a small number of indicators to follow trends and anticipate reversals.

Each trade deserves a name: Dr. Elder uses three trading systems, and he will show you examples of each.

Risk control: learn to set intelligent stops, based on market's behavior. Learn to manage trade sizing.

This class will focus on decision-making **in current markets**. Rather than dead PowerPoints showing the past, Dr. Elder will use trading software and current data.

You are welcome to ask about **specific stocks, futures, and currencies**. Imagine how useful it will be to see how a professional trader plans his trades in front of you. You will receive answers to your important questions.

Our class will be held on a Saturday at a comfortable hotel, where you'll meet other serious traders and talk with them during coffee breaks and at lunch. Most traders feel very isolated, but traders who meet at our conferences tend to stay in touch long after the class. After the class you're welcome to stay for dinner with Dr. Elder and other class participants.
